### *Eupezizella* Höhn.

Previously considered a synonym of *Hyaloscypha*, *Eupezizella* was accepted as a separate genus for four species by Kosonen et al. (2021). It is distinguished from *Hyaloscypha* by the abundant resinous exudates, the predominantly blunt and aseptate hairs, and by the lack of overall dextrinoid reactions (Kosonen et al. 2021).
