Endoscypha Syd.

Endoscypha is a monotypic genus, a pathogen endemic to New Zealand, causing a leaf spot of *Dracophyllum*. rDNA and mtSSU sequences from voucher specimen PDD 102231 from the type locality and host, place this genus in *Helotiaceae*, close to *Hymenotorrendiella* ([Johnston et al. 2019](#), [Grupe et al. 2022](#)).
