Fuscolachnum J.H. Haines

Fuscolachnum is polyphyletic, the type species *F. pteridii* is in a clade with several other fern-inhabiting fungi, including *Scolecachnum pteridii* (Quijada et al. 2022). Other putative *Fuscolachnum* species, *F. misellum* on *Rubus* and *F. cf. misellum* on *Ribes*, form a clade with *Venturiocistella*. Based on an ITS + LSU analysis, both of the *Fuscolachnum* clades belong in *Hyphodisceae* (Quijada et al. 2022).
