

## Outlineoffungi.org - Note 1265 *Hyalodendriella*

**Web-links:** [Index Fungorum](#), [Facesoffungi](#), [Mycobank](#), [GenBank](#)

### *Hyalodendriella* Crous

*Hyalodendriella* is known only from its asexual state, morphologically similar to *Cladosporium* (Crous et al. 2007). Sequences from the type specimen (CBS 261.82) place the genus in *Hamatocanthoscyphaceae* (Wu & Diao 2023). Based on the analyses in Wu & Diao (2023), the second species referred to this genus, *Hyalodendriella bialowiezensis* Gorczak, is unlikely to be congeneric with the type species.
