Mycofalcella Marvanová, Om-Kalth. & J. Webster

Mycofalcella is one of the aquatic hyphomycetes in *Leotiomyces*. The ex-type specimen of the type species *M. calcarata* (GenBank NR_154165, CCM F-10289) belongs in the *Tricladiaceae* (Johnston & Baschien 2020). Known only from its asexual state, *Mycofalcella* is a typical aquatic hyphomycete both ecologically and morphologically, with elongate, gently curved conidia (Marvanová et al. 1993).
