

Outlineoffungi.org - Note 130, [Dactylodendron](#)

[Dactylodendron](#) Stchigel et al.

[Rodríguez-Andrade et al. \(2020\)](#) introduced [Dactylodendron](#) to accommodate *D. pinicola* (formerly *Arthrographis pinicola*) and two new species. [Dactylodendron](#), is phylogenetically closely related to *Onygenales* and is characterized by its branched conidiophores and the production of chains of arthroconidia ([Rodríguez-Andrade et al. 2020](#)) (M. Erdoğan).
