

## Outlineoffungi.org - Note 148, [Elongaticollum](#)

[Elongaticollum](#) D.S. Tennakoon et al.

[Tennakoon et al. \(2020\)](#) introduced this genus within [Phaeosphaeriaceae](#) to accommodate [Elongaticollum hedychii](#). [Elongaticollum](#) is characterized by dark brown to black, superficial, obpyriform, pycnidial conidiomata with a distinct elongate neck, and oval to oblong, hyaline, aseptate conidia. Phylogenetic analyses (maximum likelihood, maximum parsimony and Bayesian) of combined ITS, LSU, SSU and *tef1- $\alpha$*  sequence data revealed [Elongaticollum](#) as a distinct genus within [Phaeosphaeriaceae](#) with high statistical support ([Tennakoon et al. 2020](#)) (M. Erdođdu).
