

Outlineoffungi.org - Note 15, [Ahmadea](#)

[Ahmadea](#) Aman et al.

Based on combined evidence derived from the morphology and LSU sequence phylogeny, a monotypic truffle genus [Ahmadea](#) was introduced by [Aman et al. \(2020\)](#) to accommodate [A. dalanensis](#) found in arid and semi-arid regions of Punjab, Pakistan, often occurring in *Sorghum vulgare* Pers. fields where it has been known for its edibility for numerous decades (M. Erdoğdu).
