

## Outlineoffungi.org - Note 153, [Englerodothis](#)

[Englerodothis](#) Theiss. & Syd.

Theissen & Sydow (1915) introduced [Englerodothis](#) with [E. kilimandscharica](#) as type species. [Hofmann \(2009\)](#) and [Lumbsch & Huhndorf \(2010\)](#) placed [Englerodothis](#) in *Parmulariaceae*. [Hyde et al. \(2013\)](#) excluded [Englerodothis](#) from *Parmulariaceae* based on morphology; viz., enclosed ascomata and a single ascomatal wall layer composed of cells of *textura angularis*. [Pem et al. \(2019b\)](#) re-examined the type specimen of [E. kilimandscharica](#) and placed [Englerodothis](#) in *Coccoideaceae* based on morphology; viz., circular or discoid ascostroma, multi-loculate, dark pigmented, bitunicate asci and 1-septate, light pigmented ascospores (D. Pem).
