

Outlineoffungi.org - Note 160, [Eumela](#)

[Eumela](#) Syd.

Sydow (1925) introduced [Eumela](#) with *E. chiococcae* as the type species. Several authors placed [Eumela](#) in *Pseudoperisporiaceae* ([Lumbsch & Huhndorf 2010](#), [Hyde et al. 2013](#)). [Boonmee et al. \(2017\)](#) observed the holotype of *Eumela chiococcae* (S-F11418) and treated [Eumela](#) in *Dothideomycetes* genus *incertae sedis*. [Pem et al. \(2019b\)](#) re-examined the syntype of [Eumela chiococcae](#) and transferred [Eumela](#) to *Antennulariellaceae* based on morphology namely aerial mycelium colonies and ascospores features (D. Pem).
