

Outlineoffungi.org - Note 240, [Lacrima](#)

[Lacrima](#) Bungartz et al.

[Bungartz et al. \(2020\)](#) introduced this genus to accommodate a new species and three new combinations based on morphological, anatomical, chemical, and molecular data. Currently, the genus comprises four species viz., *L. aphanotripta*, [L. epiphora](#) (the type species), *L. galapagoensis* and *L. sonorae* ([Bungartz et al. 2020](#)) (M. Erdoğan).
