

Outlineoffungi.org - Note 249, [Lilapila](#)

[Lilapila](#) Baral & G. Marson

[Lilapila](#) was established by [Baral et al. \(2020\)](#) to accommodate three new species. [Lilapila](#) is characterized by purplish-black apothecia covered with large, deep purple, septate, thick-walled, finely warted hairs and (sub)globose ascospores with a single, broad and thin, lens-shaped spore body ([Baral et al. 2020](#)) (M. Erdoğan).
