

Outlineoffungi.org - Note 373, [Paramicrosphaeropsis](#)

[Paramicrosphaeropsis](#) L.W. Hou et al.

[Hou et al. \(2020\)](#) introduced *Paramicrosphaeropsis* (in [Didymellaceae](#)) based on the multi-locus phylogenetic analysis and morphological characters. This genus is phylogenetically close to [Neomicrosphaeropsis](#) and *Microsphaeropsis* and distinct from all other known genera in [Didymellaceae](#). [Paramicrosphaeropsis](#) could be distinguished from other genera in this family by producing pycnidia with an extremely thin and hyaline pycnidial wall ([Hou et al. 2020](#)) (M. Erdoğan).
