

## Outlineoffungi.org - Note 389, [Phaeoplaca](#)

[Phaeoplaca](#) Søchting et al.

[Bungartz et al. \(2020\)](#) introduced the genus [Phaeoplaca](#) to accommodate a new species and two new combinations based on morphological, anatomical, chemical, and molecular data. Currently, the genus comprises three species viz., *P. tortuca*, [P. camptidia](#) (the type species) and *P. ochrolechioides* ([Bungartz et al. 2020](#)) (M. Erdoğan).
