

Outlineoffungi.org - Note 424, [Pseudorhizophila](#)

[Pseudorhizophila](#) Y. Marín & Stchigel

Based on the combined dataset sequences of ITS, LSU, *rpb2* and *tub2* loci, [Pseudorhizophila](#) was introduced by [Harms et al. \(2021\)](#) to accommodate *Triangularia mangelotii*, which was located far from the monophyletic clade *Triangularia*, together with other three species of *Zopfiella* clustering in the same well-supported clade in *Naviculisporaceae* (M. Erdoğan).
