

**Outlineoffungi.org - Note 429, *Pucciniasporonites***

*Pucciniasporonites* Ramanujam & Ramachar (fossil)

This monotypic genus was recorded from the Neyveli lignite (Miocene), Tamil Nadu, India. The fossil spores are quite similar to spores of modern *Puccinia* Pers. (*Pucciniaceae*, *Pucciniales*) which parasitize members of *Poaceae* (R.K. Saxena).
