

Outlineoffungi.org - Note 443, [Radulomycetaceae](#)

[Radulomycetaceae](#) Leal-Dutra et al.

Based on phylogenetic analyses and morphological characters, [Leal-Dutra et al. \(2020\)](#) introduced [Radulomycetaceae](#) to accommodate *Aphanobasidium*, *Radulotubus* and *Radulomyces* within *Agaricales*. [Radulomycetaceae](#) is morphologically characterized by a combination of resupinate basidiomes, monomitic hyphal system and lack of cystidia ([Leal-Dutra et al. 2020](#)) (M. Erdoğan).
