

Outlineoffungi.org - Note 474, [Similitrichoconis](#)

[Similitrichoconis](#) R.F. Castañeda et al.

[Similitrichoconis](#), with [S. wongii](#) as the type species, was introduced by [Vera et al. \(2020\)](#). [Similitrichoconis wongii](#) is characterized by blastic production of obclavate to long fusiform, hyaline phragmoconidia that are rostrate above, uncinata below, and produced by schizolytic conidial secession of clear to translucent conidiogenous cells ([Vera et al. 2020](#)) (M. Erdoğan).
