

Outlineoffungi.org - Note 489, [Strelitzomyces](#)

[Strelitzomyces](#) Crous

[Crous et al. \(2019d\)](#) introduced this new genus with *S. knysnanus* as the type species. [Strelitzomyces](#) is closely related to *Anungitiomyces* ([Crous et al. 2019d](#)). The main differences between the two genera lie in the lack of pigmentation in [Strelitzomyces](#), and the prominently formed sclerotium-like bodies ([Crous et al. 2019d](#)) (M. Erdoğan).
