[Ahmadea](#) Aman, Khalid & Moncalvo

[Ahmadea](#) can be found in arid and semi-arid regions of Punjab, Pakistan, occurring on the ground near *Acacia nilotica* and *Sorghum vulgare* crop fields ([Aman et al. 2020](#)). [Aman et al. \(2020\)](#) described the monotypic genus [Ahmadea](#) in the family *Pezizaceae* based on LSU sequence data. The genus is typified by [Ahmadea dalanensis](#) ([Aman et al. 2020](#)) and only the sexual morph has been reported.
