

## Outlineoffungi.org - Note 561 *Acidotalaromyces* - morph notes

[Acidotalaromyces](#) Houbraken, Frisvad & Samson (H)

[Acidotalaromycesis](#) species are associated with rotting wood and require a low pH for their growth (Houbraken et al. 2020). Houbraken et al. (2020) introduced this monotypic genus in *Trichocomaceae* to accommodate *Penicillium lignorum*. The asexual morph of the [Acidotalaromycesis](#) is hyphomycetous. Both sexual and asexual morphs were reported.
