

## Outlineoffungi.org - Note 60, [Babosia](#)

[Babosia](#) D.G. Knapp et al.

[Knapp et al. \(2020\)](#) introduced [Babosia](#) within *Pezizaceae* to accommodate *B. variospora* D.G. Knapp et al. (the type species). [Babosia variospora](#) is characterized by a dark sporogenous zone and dark brown spores at maturity, the clear peridermal layer at maturity, and the variability of the ornamentation of the ascospores (M. Erdoğdu).
