

Outlineoffungi.org - Note 87, [Burrowsia](#)

[Burrowsia](#) Fryday & I. Medeiros

The new genus [Burrowsia](#) was introduced to accommodate the new species *B. cataractae*, which is known from only a single locality in Mpumalanga, South Africa. [Burrowsia](#) is characterized by its pigmented, submuriform ascospores and ascus with an apical tube structure, and also by its DNA sequence data that place it outside related buellioid genera ([Fryday et al. 2020](#)) (F. Selcuk).
